

I first began seeing Nicole in August, 2007 seeking relief from my vertigo. On a good day I would have brief “spinning” sensations and on a bad day I would be flat on my stomach clinging to my bed for dear life. After a few short months of treatment I have seen a marked improvement in my bouts of vertigo. Not only are they few and far between, but also much reduced in severity.

This past May I managed to do some damage to my right elbow. A trip to a traditional western-style MD resulted in a long list of what they couldn't do for my “tennis elbow”. The next day I made an appointment with Nicole and two weeks later the improvement in my elbow is dramatic. I've gladly recommended Nicole and her needles to several friends (some of whom are now her patients) and will definitely continue to do so in the future.

My cat Salty is also a huge fan of Nicole's bottle of “secret sauce”. He gives it 2 paws up.
